Overview Map Facilities

Population (2006) 192024
Area (sq. km) 1056.27

Listing of health facilities by type.

Sectors

Below are data from the baseline facility surveys.

Health Facilities

Health posts and dispensaries	17
Primary health clinics	10
Primary health centres	2
Comprehensive health centres and hospitals	1
Facilities that perform deliveries	7
Facilities with access to emergency transport	2
Facilities with skilled birth attendant	2
Facilities that offer measles immunizations	25

Education Facilities

Number of primary-only schools	83
Number of junior secondary only schools	12
Total number of schools	118
Pupil to teacher ratio	63 : 1
Percentage of primary school teachers with NCE qualification	36% (205/576)

Water Points

Number of improved water points	685
- Overhead tanks	67
- Taps	21
- Hand pumps	597
percentage_functional_improved	73% (502/685)

Skilled birth attendants include midwives, nurse-midwives, and physicians.

Overview | Map | Facilities

MDG Status

Below are data collected from HNLSS (2008-2009), DHS (2008), School Census (2005), HSS (2005).

Goal 1: Eradicate extreme poverty and hunger

Percentage of children under five who are underweight (weight-for-age)*	0.51
Percentage of children under five with stunting (height-for-age)*	0.53
Percentage of children under five with wasting (weight-for-height)*	0.34

Goal 2: Achieve universal primary education

Net enrollment rate for primary education	0.32
Gross enrollment rate in primary education	0.85
Net enrollment rate for secondary education	0.01
Gross enrollment rate in secondary education	0.37
Literacy rate of 15-24 year olds (men and women)	0.38

Goal 3: Promote gender equality and empower women

Ratio of girls to boys in primary schools	0.57
Ratio of girls to boys in junior secondary schools	0.28
Gender parity index (GPI) for primary schools	0.65
Gender parity index (GPI) for junior secondary schools	0.13

Goal 4: Reduce child mortality

Under five mortality rate (per 1,000 live births)*	192.08
Infant mortality rate (per 1,000 live births)*	60.39
Measles immunization rate*	0.08
DPT 3 immunization rate*	0
Percentage of children under five years of age with diarrhea who received oral rehydration therapy*	0.32

Goal 5: Improve maternal health

Proportion of births attended by skilled health personnel*	22.43
Percentage of women who attended at least four antenatal visits*	0.13
Percentage of pregnant women tested for HIV	0.01

Goal 6: Combat HIV/AIDS, malaria and other diseases

Percentage of men and women ever tested for HIV	0.16
Percentage of children under five sleeping under insecticide-treated bednets*	0.11

Goal 7: Ensure environmental sustainability

Percentage households with access to improved water sources	0.82
Percentage households with access to improved sanitation	0.42

* This data is disaggregated at the state level

Current status of each MDG based on existing data sources (DHS, HNLSS, School Census). When possible, MDGs are specified at LGA level; otherwise state values are given. MDGs 1, 4, 5, and 6 directly relate to Health.

Child mortality rates. The likelihood of a child dying before the age of 5 (under five mortality) or 1 (infant mortality).

Births attended by skilled health personnel. The proportion of births attended by skilled providers such as nurses, midwives and physicians.

Malaria is one of the leading causes of child death. Sleeping under insecticide-treated bednets can reduce both illness and transmission rates.

Access to safe drinking water and sanitation are two of the best preventive measures to reduce diarrheal disease and its consequences (i.e. malnutrition, and premature death, especially among children).

Overview | Map | Facilities

Facilities

Health posts and dispensaries	17
Primary health clinics	10
Primary health centres	2
Comprehensive health centres and hospitals	1
Total number of facilities	30

Staffing

Total number of doctors in the LGA	3
Total number of midwives and nurse-midwives in the LGA	14
Total number of nurses in the LGA	0
Total number of CHEWs (Jr. and Sr.) in the LGA	129

Child Health

Percentage of all facilities that provide measles immunizations	83% (25/30)
Percentage of all facilities except health posts* with refrigerator or freezer for vaccine storage	31% (4/13)

Maternal Health

Percentage of all facilities that offer antenatal care	63% (19/30)
Percentage of all facilities that offer family planning services	73% (22/30)
Percentage of all facilities with access to emergency transport services	7% (2/30)
Percentage of all facilities except health posts* that provide delivery services for pregnant women	54% (7/13)
Percentage of all hospitals and comprehensive health centres** that perform C-sections	100% (1/1)

Other Diseases

Percentage of all facilities that offer ACT-based treatment for malaria	83% (25/30)
---	-------------

Infrastructure

Percentage of all facilities with access to an improved water source	80% (24/30)
Percentage of all facilities with improved, functional water	57% (16/28)
Percentage of all facilities with improved sanitation	30% (9/30)
Percentage of all facilities with access to the national grid (PHCN)	23% (7/30)
Percentage of all facilities with access to alternative source of electricity/power	17% (5/30)

Basic facility and staffing overview

Overview of MDG-focused health services

Overview of health sector infrastructure

* Health posts are not designated to provide cold vaccine storage or delivery services for pregnant women.

** Only hospitals and comprehensive health centres are designated to provide obstetric surgeries such as C-sections.
